Soil Health: Prepping Beds for Spring

GreenThumb and NYC Compost Project

Want to learn how to keep your plants growing strong this season? Plant health is usually directly linked to the health of the soil it is growing in. We will cover soil health basics. Included in this will be different ways of checking to see how your soil is doing based upon special indicators. We will also cover the ways you can amend or prepare your soil differently in order to improve its health, thereby getting your plants to be well nourished and viable.

Fruit Tree Maintenance 101
Grow to Learn, Bronx Green-Up/The New York Botanical Garden, and GreenThumb

Have you ever wondered about what you can do to get a great harvest from fruit trees in your garden? In this workshop we will cover the basics of maintaining healthy fruit trees year round with an emphasis on the current spring season. Topics covered will include pest management, pruning, use of amendments or fertilizers and best practices to maximize fruit production. Participants will have an opportunity to get hands-on practice in assessing and caring for fruit trees in an on-site orchard on the school’s campus grounds. Hand pruners will be provided to participants from registered garden groups — distribution will be limited to one pair per garden group.
